This report describes changes to the Fund that occurred during the reporting period.

WHAT WERE THE FUND COSTS FOR THE PAST YEAR? (based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class I	\$64	0.60%

HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?

For the year ended May 31, 2024, relative performance for the Jensen Quality Growth Fund was aided by an overweight position in the Information Technology sector and underweights in the Real Estate, Utilities and Energy sectors. Stock selection marginally benefited relative Fund performance in the Materials sector. Relative performance was hindered by the Fund’s underweight position in the Communication Services and Financials sectors and overweight positions in the Health Care and Consumer Staples sectors. Stock selection detracted from relative performance in the Health Care, Information Technology and Consumer Discretionary sectors.

During the period, the strategy continued its high allocation to quality companies, as defined by the S&P Earnings and Dividend Quality Rankings. The Fund’s allocation to the highest-quality companies — those rated A+, A and A- — averaged 56.33% of portfolio assets compared to 34.01% of the S&P 500 Index. This significant overweight to quality detracted from the Fund’s relative returns during the period, which we believe were driven by increased investor appetite for risk following the U.S. avoidance of a recession and easing concerns over inflation.

HOW DID THE FUND PERFORM OVER THE PAST 10 YEARS?*

The \$250,000 chart reflects a hypothetical \$250,000 investment in the class of shares noted and assumes the maximum sales charge. The chart uses total return NAV performance and assumes reinvestment of dividends and capital gains. Fund expenses, including 12b-1 fees, management fees and other expenses were deducted.
